## *Experience*

### **Various Volunteer Work**

1998 - Present

- Assisted Bay High School Technology Academy:
  - Set up, installed, maintained, and performed system administrator duties on a FreeBSD server for use as a multi-user E-Learning environment. Integrated a PHP classroom management application with a file server and created a secure tunnel for remote administration or teacher login.
  - Assisted with troubleshooting and maintenance of school computers and LAN.
- Technology Consultant for Ventura Consulting Group providing domain, hosting, and email solutions.
- Contributed to the world-wide Freesco project (<http://www.freesco.org>):
  - Developed, maintained, and supported several highly popular mail server packages.
  - Provided online technical support for the project as a whole via the community forums.
- Conceived and implemented a dynamic web presence for an international musician, with hosting, email services, and a unique Perl server-side solution to facilitate replying to fan email.
- Repaired, built, and upgraded computers for family, associates, or home use.
- Maintained and administered a multi-platform medium-sized Cat 5/Wi-Fi network.
- Provided ongoing technical support and computer maintenance for family and associates.

### **Mardi Gras Nightclub**

**Dundee, Scotland, UK**

*Technical Operator, Lighting Director, and DJ*

1995 - 1998

- Award winning member of entertainments team.
- Revamped and improved programming of technical lighting equipment.

## *Education*

### **University Of Dundee**

**Dundee, Scotland, UK**

*3 years Math and Computer Science*

1991 - 1994
